Allowable Subject Matter

1. Claims 2, 4, 5, 6, 7, 16-21 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Patentability of the claimed invention is directed to a paving block having a plurality of lateral sides, each comprising: At least one channel extending from a bottom surface towards an upper surface (which forms a traffic bearing surface), the channel being wider than it is deep; and an upper tapered planar portion on each of side of said block, such that the upper tapered planar portion is angled from the vertical plane of the lateral sides, in the range of greater than 0 degrees and less than fifteen degrees.

In regards to claims 7, 16 the phrase "the paving blocks are made form a material impermeable to water"; is synonymous with the Specifications' disclosure that the paving blocks are made from fired clay, concrete. Although the Specification includes "other like materials"; the scope of the "other like materials" is indefinite, since the Specification does not disclose what is considered equivalent to fired clay or concrete. Hence, the claimed paving block of claims 7, 16 are seen to be made from fired clay or concrete.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
